PALLETS

The most economical and effective new pallet is custom designed for size, lift devices, load weight and type, number of uses, as well as other customary characteristics. The grade and amount of wood, the design and the wood quality are major determinants of cost. Pallets can be new, remanufactured or used.

STRINGER PALLETS

The most commonly used pallet in the United States, size 48x40 also known as a GMA pallet. Called a stringer pallet because it has "stringers" which support the unit load. There are over a hundred styles of Stringer pallets with many variables to consider if special specifications are needed.

- Number of "Stringers" or deck boards
- Runners can come 2-way, 4-way or full 4-way entry for lift truck ease
- Number and size of top and bottom deck boards
- Optional chamfered bottoms for use with pallet jacks

BLOCK PALLETS

4-way entry pallet. Made of solid wood, plywood, or plastic to support heavy loads. Most block style pallets have 4-12 blocks to support the unit load.

We stock a wide variety of sizes:

48x48, 48x44, 48x42, 48x36, 44x44, 42x42, 36x36

There are always loads on the ground to supply our customers.

Any size, any amount, we will build specification sizes at our customer request.

HEAT TREATMENT

Triangle Packaging is licensed to provide certified, heat-treated products for export to the European Community. Each load will provide phytosanitary certificates to, if requested or needed by the customer.

ISPM-15 STANDARD

The IPPC standard (ISPM-15) allows for two types of treatment methods: Methyl bromide fumigation or heat treatment. The standard calls for heat-treated material to be heated to 56 degrees Celsius for 30 minutes.

THE RIGHT SOLUTION

There are many problems businesses have when buying wooden pallets:

- NOT** getting the right quality material,
- NOT** getting the right product specifications for the job,
- NOT** getting fast and dedicated service from the vendor,
- NOT** paying the right prices for the product.

Triangle Packaging Inc. eliminates these **NOT's** above. We have direct partnerships and contracts with lumber mills located in Pennsylvania. This only benefits all our customers in saving money. We have experience in the wood and lumber industry for close to two decades, enabling us to cooperate with clients on which products will best serve their business as a whole.

Triangle Packaging Inc. prides itself with the unheralded value of customer satisfaction.

Fortune 500 clients or small businesses, our service and products pave the way to greater success.

We have numerous clients in these sectors:

- Pharmaceuticals
- Logistics
- Capital Goods
- Warehousing
- Food Industries
- Transportation
- Technology
- Basic Materials
- Energy

In addition, we offer scrap removal and disposal of pallets at a low cost and environmentally efficient solution. To stay ahead of the competition we try to offer the most cost effective pricing and top of the line materials.
